THE LATEST NEWS.

After several pages of this issue had gone to press, the steamer Aorangi unexpectedly brought two days' later news than that of the Peru from San Francisco. It was unexpectedly because, had the Aorangi left on schedule time and not made an excellent passage, there was not much reason to look for later news of any considerable amount. This proposition has not met with much favor at home or abroad, and Representative Wilcox, who was chosen by the native element over the Republican and Democratic candidates, is the sponsor of the movement for statehood. It is not likely that Hawaii as a State would be governed better than as a Territory. Indeed it is possible that the direct gov-ernment and home rule involved in such a course would open an avenue "The Stately Homes of England." P. P. Emigration agents have been working on behalf of the Hawalian planters among the Southern negroes and efforts have been made to enlist the co-operation of the Italian government so as to turn Mediterranean emigration in the direction of the Pacific. It was only the other day that the importation of natives of Guam was declared illegal. The Chinese exclusion and the labor contract laws prevent further recourse to the Asi-

What to Do With Hawaii.

The suggestion attributed to Presient Jordan of Stanford University to settle the Hawaiian question by "ansation at the W. C. T. U. picnic in nexing the Islands to California as a f simplicity. It of course "fur the conclusion that Honolulu is 5,645 miles from San Francisco, and can therefore hardly be called "contiguous" even in these days of rapid expansion. It blinks the fact also that there are less than 2,000 male Americans of all ages in the Hawalian group.

Still, California has been a great and successful assimilator of people from every quarter of the globe, and a few thousand mongrels more or less will not perhaps trouble her greatly. Grateful on this afternoon of mid mmer was the double line of lofty ms that led up to the Mosted Manor-house, with its guard of Norman towers. So it struck the fancy of the person of exotic aspect who was ng easily up the avenue at the end of a long cheroot, with a small "Say," said the perfect stranger, as he overtook a gentleman of homely exterior and clapped him pleasantly on the back, "you happen to know if the proprietor of these ruins is anxlous to do a deal?" The lord of the manor answered with a noble dignity, "It you are good enough to refer to myself," he said, "I have no intention of disposing of my ancestral proper-ty. My name is Bull." A fine reserve characterized the reply of the Lord of the Manor, "You not appear," he said, "to grasp the fact that there are things which money cannot buy from an honorable Englishman. AMERICAN ENTERPRISE.

Yankees Have Much to Say in Canada's Business.

In view of the bitter criticism of the United States and of things Am erican which comes so frequently from the Canadian press, it should be noted that the part played by American enterprise and capital in the Dominion is generally recognized by the more thoughtful journals of Cana-The Canadian Manufacture (Toronto) declares that Canada must more and more turn to her Southern neighbor for the capital she needs. Speaking of the resources of the Dominion in the way of wood for paper pulp, this journal says that the pro moters in this industry are all look

It is the same in other industries, continues The Manufacturer: "It was in the United States that most of the Deminion Iron and Steel Company's issue of \$13,000,000 was underwritten last year. It is in New York and Philadelphia that a million dollars is being obtained for the new steel-works at Collingwood, Ont. To that there are some instituotions in the United States Mr. Clergue (president of the new Algoma Central Railroad, has hitherto looked for the vast sums required for his undertaking. and he is now in England, presumably to sell the bonds of his road. If we are ever to get the power develope at Niagara Falls, it must be by the aid of American enterprise, if not actual American capital."

When you come to think of it says The Herald, a Montreal paper, Americans have had a good deal to do and to say in the development of our resources, and it proceeds to put the case as follows:
